

See you at TapeOpCon !

See you at TapeOpCon !

The folks at TapeOp magazine have been a welcome part of the audio landscape for many years. They will be hosting the 6th annual conference in Tuscon, June 8-10.

Brent will be a part of the workshop, "Fixing it in the Mix", which presents approaches to working with tracks that, while they may be great performances, may have some problems, sonically. Brent will be contributing some of his ideas and techniques that he uses to evaluate mixes at the studio. Many mix issues are best addressed early in the mix stage and knowing how to identify and correct these issues help make a better engineer and a better listener

Reminder: we encourage our clients to send early mixes to us & give feedback to engineers to make tweaks before a mastering session. Let us know if we can help.
