

DVD-audio

We now offer the opportunity to get a DVD-audio disc along with your audio CD at minimal additional cost for most projects !

Why DVD-A ? It's great way to present your project with better fidelity than an audio CD can offer. It also provides you with a great hi-res format to use for archival purposes. Who knows? In a few years you may need to release your project on Blu-ray or as a high-res digital download.

DVD-audio discs are supported on many DVD video players and computers.

Please let us know before your session if you are interested in a DVD-A of your project.
